Ahmed Nabil

Backend Developer (Node.js)

ahmednabil2001927@gmail.com • Beni-Suef, Egypt

LinkedIn • GitHub

PROFESSIONAL SUMMARY

Backend Developer with 3+ years of hands-on experience building scalable Node.js APIs, SaaS integrations (Stripe, FCM, Google Maps), and TypeScript applications. Skilled in RESTful architecture, MongoDB/PostgreSQL, multi-role JWT authentication, and third-party API integrations. Proven track record delivering production-level solutions across e-commerce, logistics, legal, and transportation domains. Fast learner with a passion for clean, efficient, and well-structured code.

TECHNICAL SKILLS

1. **Node.js & Express.js:** Core stack — production-level REST APIs, MVC architecture, middleware design
2. **RESTful API Design:** Secure, well-structured APIs with proper validation and error handling
3. **MongoDB & Mongoose:** Complex schema design, relationships, and aggregations
4. **JWT Authentication & Security:** Role-based access control, token handling, data privacy
5. **TypeScript:** Static typing for improved code quality and maintainability
6. **Third-party Integrations:** Stripe (payments), FCM (push notifications), Google Maps API, Aramex
7. **Socket.io:** Real-time messaging and live features
8. **MySQL / PostgreSQL:** Relational data modeling and optimization
9. **Cloudinary & Multer:** Media and file upload management
10. **Git & GitHub:** Version control, branching, and collaboration
11. **Postman:** API testing and documentation
12. **Deployment:** Application deployment; expanding knowledge in CI/CD pipelines

EXPERIENCE

Backend Developer — Graduation Project

Beni-Suef University, Faculty of CS & AI | 2022 – 2023

- Engineered a scalable backend using Node.js and Express to manage complex ride-booking workflows and user traffic.
- Designed and optimized MongoDB/PostgreSQL schemas for real-time route data, vehicle details, and booking history.
- Implemented JWT-based authentication and secure authorization protocols for passengers and drivers.
- Developed intelligent booking logic for bus and van routes with accurate seat availability and trip scheduling.
- Integrated Google Maps API for route visualization and accurate trip estimations.

PROJECTS

postGait — Logistics & Shipping Management System [GitHub Repo]

- Designed a complex backend architecture with 15+ specialized data models handling shipments, waybills, and financial transactions.
- Engineered automated billing, shipment tracking, and integration with major shipping providers (Aramex).

Legal Advice Platform [GitHub Repo]

- Designed a lawyer-client consultation platform with Firebase Cloud Messaging (FCM) for real-time push notifications.
- Built an office booking engine and instant messaging system for legal consultations and video content management.

Mutanaqil App — Transportation Booking (Graduation Project) [GitHub Repo]

- Developed a scalable backend for air-conditioned bus and van bookings with real-time seat availability logic.
- Optimized route scheduling to ensure affordable and reliable transit services.

E-Commerce Application [GitHub Repo]

- Engineered a full-featured e-commerce backend with cart management, automated price calculations, and a promotions engine.
- Built a robust order tracking system with persistent purchase history.

School Management System [GitHub Repo]

- Developed a centralized backend for student/teacher data management, academic record tracking, and course scheduling.
- Engineered a robust database structure ensuring data integrity and efficient information retrieval.

EDUCATION

B.Sc. Computer Science & Artificial Intelligence

University of Beni-Suef | September 2019 – May 2023

- Focused on Data Structures, Algorithms, Database Management Systems (SQL/NoSQL), and Web Development.
- Completed multiple projects using Node.js and Express, focusing on server-side logic, API security, and data handling.

CERTIFICATES

Full Stack Web Development Diploma

Route IT Training Center | December 2022

Intensive 9-month professional diploma covering end-to-end web development: Node.js backend architectures, frontend frameworks, and database management for scalable production-ready applications.

International Computer Driving License (ICDL)

YES Academy | January 2021

Certified proficiency in computing skills, office productivity software, data management, and digital collaboration tools.

LANGUAGES
